

"I love how easy it is to order custom products!"

"Our Zero Injury Program's #1 goal is keeping employees safe," says Tami Besser, Safety Administrator at M. A. Mortenson Company, based in Minneapolis, MN. *"It also contributes to minimizing production cost to ourselves and our customers, and producing better business results. The custom products we've ordered with the Zero Injury logo are the tools that help keep the program and its objectives in team members' minds."*

To achieve the goals of their world-class safety program, Mortenson has used custom products from J. J. Keller to reflect their specific operating requirements and increase employee awareness and participation. Starting with custom hot work permits, they have branched out to signs, checklists, tags, stickers and more.

"J. J. Keller has simplified the custom product process and streamlined the paperwork," observes Tami. *"We're a national company with multiple locations, and J. J. Keller ships our products wherever we want them to go. Their warehousing service saves us money, processing time, and storage space."*

"Our J. J. Keller sales rep understands and embraces our work culture, and serves as part of our team to develop new custom products to further our safety goals. When it comes to taking care of our team members, we go beyond what's required, and that's how J. J. Keller takes care of us."
